

Articulated Concrete Block Mats

AQUATEC MARINE & INDUSTRIAL ROPE

Interconnecting Cable/Rope Selection

Using AB Block Mats for boat ramps or salt water environments we would recommend that Marine Rope be selected as the interconnecting cable as it will not rust when stressed, (unlike Stainless Steel).

Also the Aquatec Rope has a higher breaking strain than the 8mm Stainless Steel Cable. See details below.

16mm Donaghys Aquatec Marine and Industrial Rope

CHARACTERISTICS

- Ø16mm = 3950 kilo break load
- Blended p/e and p/p, giving the good handling of p/e and the strength of p/p.

APPLICATIONS

- Marine, Fishing, Rural, Heavy industrial.
- Truck Ropes, Nets, Ladder Ropes, Foot Ropes.
- Blasting mats, Car tow ropes, Air Sea rescue lines, Slings.
- Control ropes, Head lines, Ducting draw lines.

FEATURES & BENEFITS

- Abrasion and Shock load resistant
- High strength to weight ratio.
- UV resistant with excellent weathering properties

NOTE: AB Block Mats also available using 8mm Stainless Steel cable for interconnecting Blocks. Request details from our office.
